RE: Ninth Progress Report
Administrative Order on Consent for Removal Action
Wells G&H Superfund Site
Olympia Nominee Trust Property
60 Olympia Avenue
Woburn, Massachusetts
CERCLA Docket # 01-2003-0023

Dear Mr. Gardner:

GeoInsight, Inc. (GeoInsight) prepared this progress report to describe activities completed at 60 Olympia Avenue in Woburn, Massachusetts (the Property) during the Ninth progress report period. This progress report was prepared in accordance with the March 17, 2003 U.S. EPA Administrative Order on Consent for Removal Action (CERCLA Docket No. 01-2003-0023; the "Order"). The progress report was prepared by GeoInsight at the request of Olympia Nominee Trust, current owner of the 60 Olympia Avenue property.

The information is presented in two categories: 1) information regarding activities in the surface soil area impacted by polychlorinated biphenyls (PCBs); and 2) information regarding activities involving subsurface soil and ground water impacted by trichloroethylene (TCE).

PCB-Impacted Area- Removal Action

During this reporting period, activities related to the PCB area were not conducted.

TCE-Impacted Soil – Assessment and Remedial Planning

On December 8, 2003 GeoInsight met with Raito, Inc. at GeoInsight's Westford, Massachusetts office to discuss soil-mixing remediation techniques in the TCE impacted area. Based upon information obtained during this meeting, on December 19, 2003, GeoInsight submitted to the United States Environmental Protection Agency draft plans for remedial alternative layouts and potential system configurations.

Please contact us at 978-692-1114 if you have any questions or if you would like to discuss this project.

Sincerely,
GEOINSIGHT, INC.
